Department of Computer Science in collaboration with
AARWII Tech Solutions Pvt. Ltd.
Career Orientation Program on “Mastering the Art of Interview Preparation”
on 17th March 2025 for M.C.A & M.Sc.(Computer Science) students

Objective: To equip students with the skills and knowledge to effectively prepare job applications and succeed in interviews.

P.B. Siddhartha College of Arts, Computer Science Department organized Career Orientation Program on “Mastering the Art of Interview Preparation” with Mr.Udatha Ramesh, Principal Architect from AARWII Tech Solutions Pvt. Ltd., located at the Mangalagiri IT Park, on 17th March 2025. The seminar was held for students pursuing M.C.A, and M.Sc. Computer Science programmes.

- In the current scenario, as many candidates apply for a single job, the resource person explained how these applications are selected using software.
- The resource person also shared techniques on how applicants should prepare their job applications in a way that organizations will consider them.
- Using AI software (for example, www.resumaker.co.in), the resource provided training on how candidates can quickly and easily create job applications that companies will take into account.
- To create an effective job application, the resource person emphasized several important techniques such as a clear format, basic information, objective or summary, educational details, work experience, skills, references, languages, personal thoughts, and how to provide contact information.

Outcome: Students gained practical insights and skills to create standout job applications and excel in interviews.

The Future Belongs to Artificial Intelligence

DECCAN FREEDOM NEWS
Vijayawada

The future is entirely dependent on artificial intelligence, and students must be well-informed about its impact, said Udatha Ramesh, a representative of RV Tech Solutions Private Limited, based in Mangalagiri IT Park. He was the chief guest at an awareness program on “Best Practices in Job Applications” organized jointly by the Departments of Arts, Business Administration, and Computer Science at P.B. Siddhartha College of Arts & Science on Monday.

Addressing MCA, MBA, and M.Sc. Computer Science students, Ramesh explained how a large number of candidates apply for a single job and how companies use software to filter applications. He detailed how candidates should structure their job applications to increase their chances of being considered by recruiters. He also provided training on how AI software can help candidates create applications in a way that aligns with the selection criteria of various organizations.

Ramesh highlighted key aspects of crafting an effective job application, including a clear format, essential personal details, a well-defined objective or summary, academic qualifications, professional experience, skills, references, language proficiency, personal insights, and proper contact details.

The event was attended by College Principal Dr. Meka Ramesh, Director Vemuri Baburao, Dean Rajesh C. Jampala, Head of the Computer Science Department Dr. T. S. Ravi Kiran, faculty members, and students.
